

Security Services Support

EVOLUTION of EXCELLENCE

Linxx Global Solutions

Linxx Global Solutions, Inc. (Linxx) is a service-disabled veteran-owned business with offices across the United States. Our growing national and international business operations are managed from our corporate headquarters in Virginia Beach, Virginia. Over the last 16 years, Linxx has offered a wide range of educational, training, professional, and program management services around the world. We support all branches of the Department of Defense (DoD); the intelligence community; U.S. Department of Homeland Security; and other federal, state, and local agencies.

Security Services Support

Linxx provides comprehensive consulting, assessment, training and direct security services support for the DoD, all federal agencies, and large U.S. corporations. We have extensive past performance successfully delivering security services to include: provider of the U.S. Navy's counter-piracy training since 2006, ITAR sensitive inventory control in support of U.S. Army GWOT aviation initiatives, security assessment support for the 2004 Athens Olympics, maritime force protection security services for BAE Systems, and several significant commercial client contracts worldwide. Linxx employs a comprehensive client requirements process approach that allows us to quickly target key challenges. Our offerings can be holistic and purchased turn-key or selected as needed.

- Physical security system software
- Cyber system, information system security software, and software integration

Security Consulting

Linxx believes a solid security solution must be comprehensive, coordinated, and cost effective. The first step toward achieving these aims is to evaluate the threats, challenges, client expectations, and the physical and technical status quo. Security operations can be daunting when approached without a firm grasp on

reality. A reality is comprised of validated risks, budget constraints, and external pressure to comply with industry norms and national security mandates. Linxx offers skilled, professional security advice delivered in the form of consulting products or ongoing consulting services support.

Security Specific Training and Exercise Support

Linxx delivers cutting edge security training across the United States and worldwide. Originally focused on maritime challenges, Linxx has broadened our base to include all types of infrastructure on land or at sea. We also provide exceptional service to commercial enterprises and corporate facilities. Linxx can assist our clients in assessing their level of competency against the context of their specific environment and mission. Training, education, and exercise support all combine to improve performance and increase an organization's return on their security investment.

Security Focused General Contracting and Project Management

Our clients are often best served by engaging Linxx as a general contractor for security infrastructure installation and testing. We are adept at project management and believe a well-designed security risk mitigation plan deserves cost and time efficient installation/upgrade project execution. Linxx is capable of coordinating and communicating with all subcontractors and vendors in accordance with our client's detailed security master plan.

Summary

Linxx is a well-run, lean company with an excellent past performance record. The value we deliver to our customers can be summed up in one word: commitment. We are dedicated to improving the security of America and her allies through insightful analysis, creative product development, and exceptional customer service. To that end, we employ a large number of former service men and women who leverage their considerable experience and knowledge to accurately address the challenges facing our U.S. Government and corporate customers. In addition to these talented veterans, Linxx employs intelligent, business-minded professionals who understand program management, risk mitigation, and quality assurance. Our service offerings are divided into three categories: Security and Training Services, Professional Services, and Technical Services.
