

Linxx Global Solutions

Linxx Global Solutions, Inc. (Linxx) is a service-disabled veteran-owned business with offices across the United States and in Dubai, United Arab Emirates. Our growing national and international business operations are managed from our corporate headquarters in Virginia Beach, Virginia. Over the last 15 years, Linxx has offered a wide range of educational, training, professional, and program management services around the world. We support all branches of the Department of Defense (DoD); the intelligence community; U.S. Department of Homeland Security; and other federal, state, and local agencies.

Technical Services

Linxx routinely facilitates performance of individuals, organizations and new product concepts by participating in both design and performance validation activities. We help during in the design phase of research and development by adding unique subject matter expertise. Our experienced professionals provide validation and insight during the test and evaluation of evolving processes, systems, and products. Our consulting and advisory outcomes can be delivered as published documentation or through face to face interaction. We provide services in the following areas:

- Research and Development
- Test and Evaluation
- Consulting and Advisory Support
- Special Studies

Research and Development

Tactical military and law enforcement equipment serves a critical purpose and must perform as designed. Often improvement, innovation and invention are well served by using representative “end users” in the early design phase. Linxx can provide a wide range of military and law enforcement professionals who understand research and development processes and who are capable of adding experience and practicality into the mix. Our support can be retained for the complete project or on an as needed basis.

Test and Evaluation

Practical application of emerging technology in the field is a proven design validation technique. Linxx can provide qualified personnel to learn testing protocols and conduct testing regimens, in the appropriate environments. We specialize in man-packed technology for the warfighter but can also support light tactical mobility test and evaluation to include; maritime small craft, ground assault vehicles, command center technology, and light weight ISR products.

Consulting and Advisory Support

Linxx provides consulting and advisory support to existing government customers as part of our services delivery philosophy. In addition, Linxx expertise and knowledge can be retained to solve complex issues by providing; process gap analysis, quality assurance evaluation, leadership coaching, management consulting, and a wide range of other advisory support. Linxx currently has embedded advisors and mentors in government organizations and can contract for short or long term service support.

Special Studies

Linxx manages a pool of talented experts that represents considerable depth in areas, such as terrorism, counterterrorism, light infantry operations and equipment, man-pack communications, field medicine, homeland security, maritime infrastructure security, vessel defense and security, and all aspects of military leadership. This capability lends itself to modeling and simulation support, exercise design, distance and nontraditional learning programs, and consultation on special projects requiring the merger of different agencies and units.

Summary

Linxx is a well run, lean company with an excellent past performance record. The value we deliver to our customers can be summed up in one word, commitment. We are dedicated to improving the security of America and her allies through insightful analysis, creative product development, and exceptional customer service. To that end, we employ a large number of former service men and women who leverage their considerable experience and knowledge to accurately address the challenges facing our U.S. Government customers. In addition to these talented veterans, Linxx employs intelligent, business-minded professionals who understand program management, risk mitigation, and quality assurance. Our service offerings are divided into three categories: Education and Training Services, Professional Services and Technical Services.
